

FISH

FISH

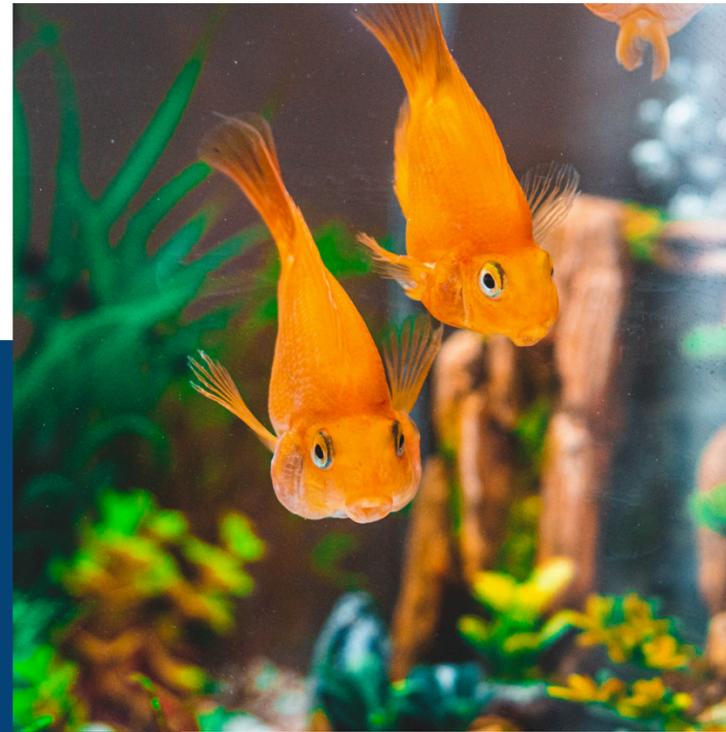

ABOUT FISH

Fish are among the most fascinating and diverse pets you can keep. From vibrant tropical species to elegant goldfish and peaceful community tanks, aquarium fish bring colour, movement, and tranquillity into homes and businesses across the UK.

At Aquassi Ltd, we specialise in helping beginners and experienced aquarists understand fish species, behaviour, care requirements, and the importance of creating a healthy aquatic environment.

We give 100% commitment to protecting and recreating the 80% of nature that depends on water.

100%

Water covers most of our planet and supports the majority of living ecosystems. When you create an aquarium, you're not just adding décor to a room – you're building a living, breathing aquatic environment inspired by nature itself.

80%

Rivers, lakes, oceans, wetlands – aquatic systems are the foundation of global biodiversity. Fish, plants, invertebrates, and microorganisms work together in delicate balance.

OUR NATURE

02

At Aquassi Ltd, every project is built around precision, creativity, and aquatic expertise. From bespoke home aquariums to large-scale commercial installations, our projects reflect our commitment to quality craftsmanship and long-term fish health.

01

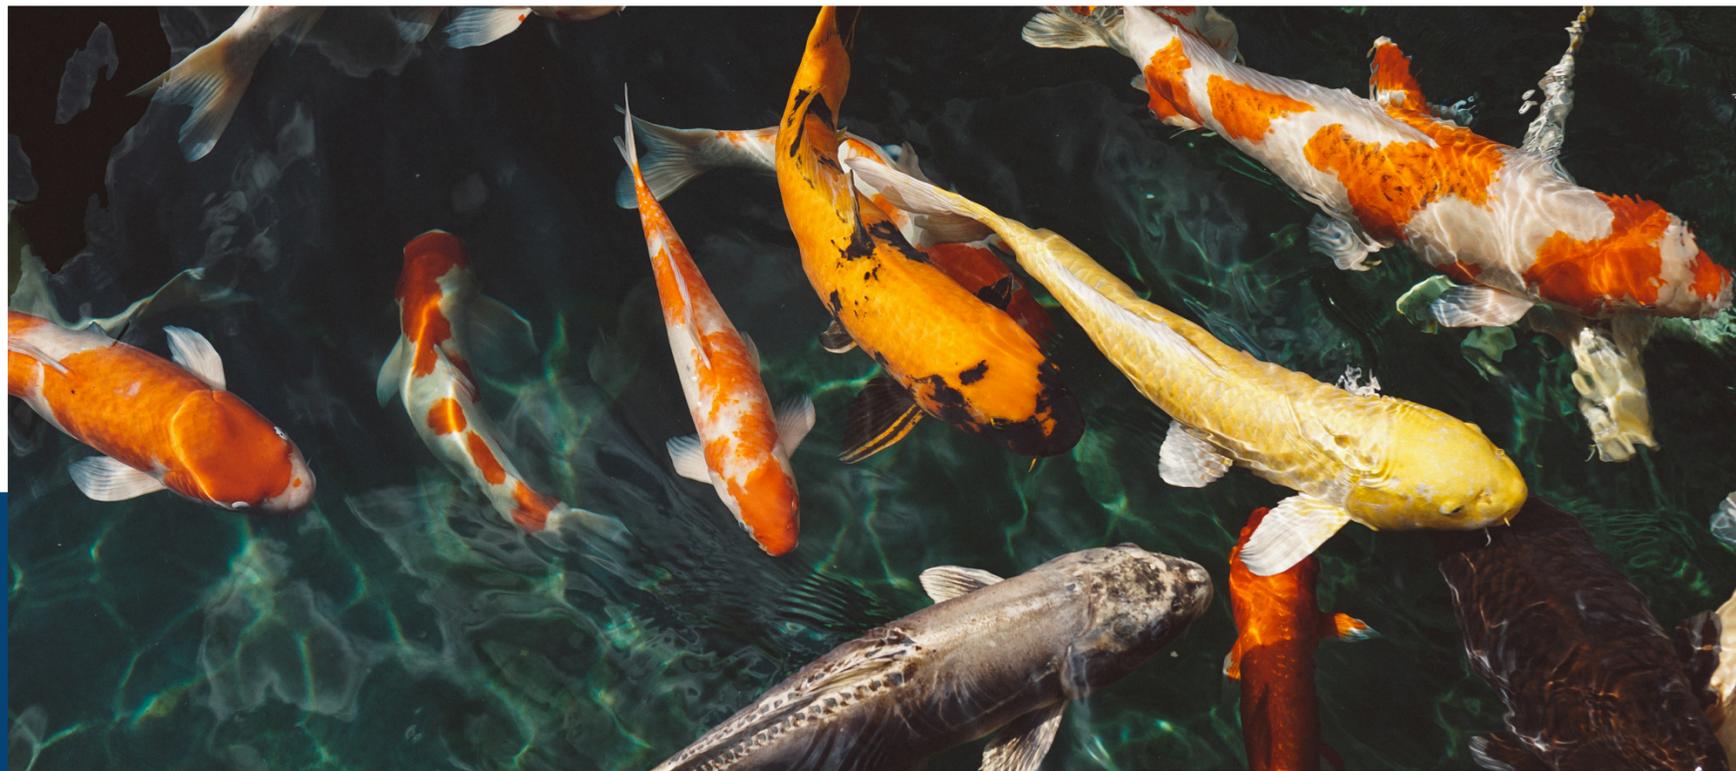

We don't just install fish tanks – we design fully balanced aquatic ecosystems tailored to each client's space and vision.

OUR PROJECT

To create sustainable, beautifully balanced aquatic ecosystems that bring nature indoors while promoting responsible fish keeping across the UK.

We believe aquariums should be more than decorative tanks – they should reflect the harmony, diversity, and tranquility of the natural aquatic world.

OUR VISION

OUR MISSION

To design, install, and maintain high-quality aquariums that promote fish health, environmental responsibility, and lasting customer satisfaction across the UK.

We are committed to creating aquatic ecosystems that are not only visually stunning but biologically balanced and sustainable.

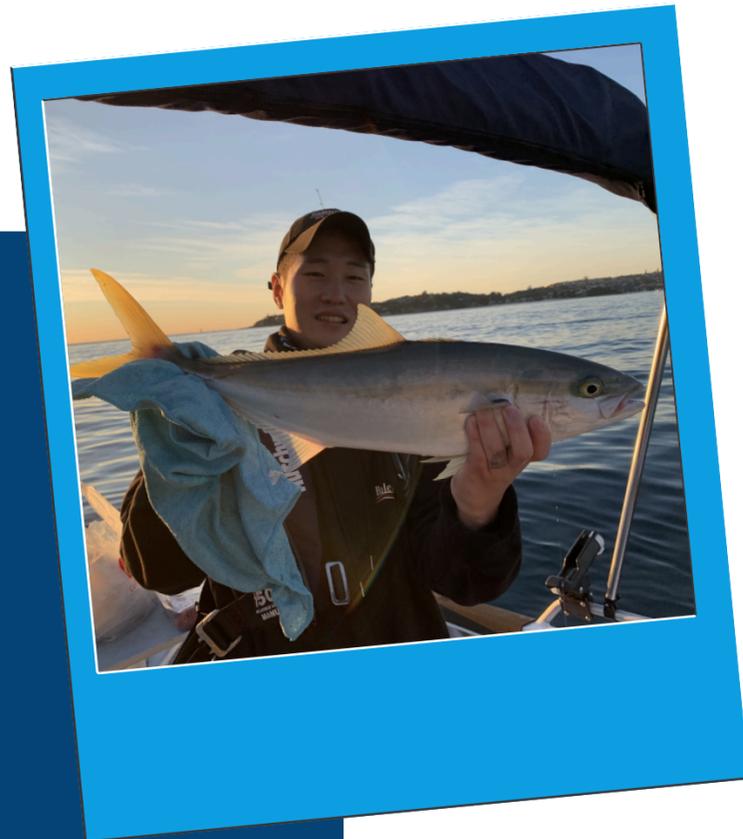

OUR PORTFOLIO

NEW COLLECTION

AQUARIUM WORKERS

JEANNE VILLEPREUX-POWER

At Aquassi Ltd, we celebrate the pioneers who shaped modern fish keeping and marine science. One of the most influential figures in aquarium history is Jeanne Villepreux-Power, widely known as the “Mother of Aquariophily.”

KELLY TARLTON

Aquarium innovation has transformed the way we experience marine life. One of the most influential pioneers in modern aquarium design was Kelly Tarlton – the visionary behind the first curved, tubular acrylic aquarium tunnel.
